# Reflect Scientific Inc

# Safe harbor statement

Forward-looking statements in this presentation are made pursuant to the “safe harbor” provisions of the Private Securities Litigation Reform Act of 1995. Investors are cautioned that such forward-looking statements involve risks and uncertainties, including without limitation, continued acceptance of the Reflect Scientific Inc.’s products, increased levels of competition for the company, new products and technological changes, the company’s dependence on third-party suppliers, and other risks detailed from time to time in the company’s periodic reports filed with the Securities and Exchange Commission.

# Overview

Reflect Scientific, Inc. (symbol: RSCF), based in Orem, Utah, develops and markets innovative, proprietary technologies in cryogenic cooling for the biotechnology, pharmaceutical, medical, and transportation markets. Among Reflect Scientific's products are low-temperature freezers and refrigerated systems for laboratory, transportation, and computer server room uses. Reflect Scientific has created an IP portfolio of over 30 patents relating to the use of liquid nitrogen. Liquid nitrogen is the primary coolant used in all the Cryometrix products.

**CRYOMETRIX®**

brand products

[cryometrix.com](http://cryometrix.com)

# Cryometrix cold transport solutions

From the S-90 self-contained transportable ultra-cold freezer to a 53-foot trailer temperature sensitive products can be reliably shipped at a wide range of temperatures. This patented liquid nitrogen technology is ideal for high value pharmaceutical products that must be kept cold during transportation. No electric refrigeration pumps, no CFCs.

## Cryometrix cold-chain air transport solutions

The RMF-90 air freight freezer is designed to maintain precise temperatures for high-value cargo that must be kept at very cold temperatures during air transport. It is loaded easily onto the cargo plane with current equipment. No CFC's and no refrigeration pumps required.

# Cryometrix Freezers

Ultra low temperature freezers for blast freezing, manufacturing and storage of vaccines and biopharmaceuticals.

Competitive advantage - unmatched cooling speed, temperature uniformity, extremely low maintenance costs, uses patented liquid nitrogen technology – no pumps, no CFCs.

# Cryometrix solvent chillers

The L-80 series solvent chillers are designed to meet the needs of the rapidly growing hemp industry for efficiently extracting the active cannabinoids from the dried biomass but can be used anywhere cold solvent is required.

The L-80 uses patented liquid nitrogen technology to achieve rapid cooling and accurate temperature control of the solvent.

**VISACON**

brand products

[visacon.com](http://visacon.com)

# Visacon chromatography products

Visacon provides the highest quality OEM products for chromatography. We have 25 years of experience providing quality chromatography products to the life sciences market.

# Markets Served

Reflect Scientific through the Cryometrix and Visacon brand products serve a wide variety of industries and markets.

- Pharmaceutical/Biologicals manufacturing, storage, and transportation.
- Natural products extraction
- Whole blood and blood products cryo-processing
- Instrumental analysis and chromatography consumables
